The assembly quick, easy, precisely fitting

The easy assembly shows the professionalism of **P 710 TOP - The Original**. The elaborate construction guarantees an almost jointless connection between the individual profile planks thanks to the high accuracy of fit of the tongue and groove joint. The professionals in the building industry appreciate particularly the click system. It allows mounting the profiles by one person only and shortens the mounting time significantly thus increasing the profitability of this profile system **NEW:** Assembly either with mounting clip or with screws.

Mounting clip
